PREMIER PUMP & POWER
THE WAVE OF THE FUTURE

The Wave of the Future

WHO WE ARE

We have been designing and building equipment for the construction, oil & gas, waste water, agriculture, and mining industries since 1999. Our equipment can be found operating worldwide, with a focus on markets in the USA, Middle East, Africa, South America and Asia. We manufacture portable self-priming pumps from 2-1/2" to 24", trailer or skid mounted, diesel or electric along with a line of the most efficient flameless heaters specifically designed for the oil and gas industry.

QUALITY PRODUCTS

Premier Pump and Power designs products for years of trouble free service. All units are 3D modeled which allows us to have all raw materials laser cut and formed to exacting standards. This assures quality and repeatability from unit to unit and order to order.

All trailers and frames we manufacture are finished with high quality powder coating. Powder coating is superior to traditional painting. Powder coating is 4 to 10 times thicker than paint, it is physically harder than paint, and has

higher corrosion resistance than typical spray painting. Powder coat is also an environmentally friendly process. The powder is not a significant health, fire, or environmental hazard, and has no VOCs.

PRODUCT LINE

- Diesel powered pumps
 - Dry-prime
 - Wet-prime
 - Sound attenuated
- Electric powered pumps
 - Dry-prime with or without starters & controls
- Diesel powered hydraulic power units
 - Open and sound attenuated
- Diesel powered flameless heaters
 - 500k BTU/hr, 1M BTU/hr, 1.5M BTU/hr

ENGINEERING

With over 100 years of pump application and engineering experience we design quality products built for the rigors of the industries we serve. Every unit we manufacture is specially designed using state of the art 3D modeling software complete with FEA capability.

Premier Pump and Power's enclosed sound attenuated units are specifically designed for uses in residential areas and 'quiet zones'. They meet or exceed all industry standards for sound level db(A).

CAPABILITIES

- 4,100 sq ft of office/conference space
- 40,000 sq ft of manufacturing space
- 11 full function welding stations
- 40 ton bridge with (2) 20 ton hoists
- 25 ton bridge with (2) 12.5 ton hoists
- (2) 5 ton bridges with (2) 2 ton hoists each
- 10' x 10' x 20' powder coating booth
- Complete sandblasting ability
- 30-40 units/week capacity

DESIGN TO ORDER

Premier Pump and Power can design around any project requirements. We have added cranes, tool boxes, hose racks, special suction and discharge manifolds, and custom enclosures to many orders.
